

[Start Assignment](#)

- Due Apr 29 by 11:30am
- Points 40
- Submitting a text entry box or a website url

---

## Term Project Deliverable

# Final

The third and final release adds JavaScript, jQuery and mobile functionality to your project. Post it to the GitHub in a folder called TPF (please do not mistype this name). Do not delete the TPV2 folder and do not over-write it. Test to make sure that the URL works for the GitHub hosted version. Please provide me with the URL to the hosted final version of the project.

***NOTE: more details on the expectations for this final deliverable to come...***

## Important

Be sure to use proper comments throughout your site. I will be reviewing the final design in the browser as well as the code. To get complete marks you must not only complete what is required (as outlined in the rubric) but also have clean code throughout your site.

## Presentation

Details about the presentation is to come...
