

[Start Assignment](#)

- Due Thursday by 11:30am
- Points 35
- Submitting a text entry box or a website url

---

## Term Project Deliverable

### Version 2

The second version improves upon your first version based on feedback and includes a near-finished HTML pages and CSS.

- It also includes search engine optimization, credits page and a site-map page to your first release.
- It also stresses accessibility in this version.
- You will have to have a fully functioning form by this time as well.
- And lastly, you must include at least one function written in JavaScript that performs some behavior of value for your site.

Post it to the class server on GitHub in a folder called TPV2 (Please do not mistype the name). Do not delete the TPV1 folder from GitHub and do not overwrite it. Please provide the URL on Git for the second version of the project as the deliverable.

### Important

Make a copy of your TPV2 folder and call it TPVF. After the due date make all changes in the TPVF folder. Do not update the TPV2 folder on the server. Even after TPV2 is graded, please do not make any changes to the TPV2 folder on the server as I will be comparing versions.

---

#### Term Project - V2

Criteria	Ratings					Pts
<p>Updates from Previous V1</p> <p>The grade will consider your use of backgrounds, colors, fonts, and other elements of style and your attention to principles of home page and website design - and you considered feedback from your V1 for improvements.</p>	5 pts Nicely Done	4 pts Mostly Perfect	3 pts Good	2 pts Needs Improvement	0 pts No Marks	5 pts
